

Coroutines in Kotlin

```
interface Continuation<in T> {  
    fun resumeWith(result: SuccessOrFailure<T>)  
}
```

```
inline suspend fun <T> suspendCoroutine(  
    crossinline block: (Continuation<T>) → Unit  
): T
```

Coroutines in Kotlin

```
val function: suspend (Int) → String = ...
```

```
suspend fun process(arg: Int): String = ...
```

```
val lambda = suspend { doSomething() }
```
